## **Employment History:**

### **Sanwo Tap2Pay Technology Services**

*Mobile Applications Developer*

*December 2015 - May 2016*

I work along with other Android Engineers in a team of. I am responsible for translating business requirements into Android applications. I follow standard development practices for building Android applications which include:

- Used native Java to develop mobile applications for Android.
- Involved at every project phase, from concept creation to app store deployment.
- Responsible for general maintenance of application user interface.
- Tested applications on device simulators and actual devices to fine-tune products.
- Responsible for bandwidth, memory and performance optimisation to reduce total data costs.
- Involved in the team that built Ogun State Parking Services.
- Involved in building the payment system used by ariiya tickets used on Cool FM Praise Jam.

### **Terragon Group**

*Software/DevOps Engineer*

*May 2016 - Present*

Designing, development and deployment of frontend and backend services(APIs and Micro-services). Working around Augmented Reality Application Development. I follow a service oriented architecture and try to follow the micro-service architecture.

Technology, Software and Operating Systems used:

- Java(Android)
- MongoDB

- Javascript(AngularJS and Nodejs)
- Elasticsearch
- Redis
- PHP(CodeIgniter)
- Python
- Amazon Web Services
- Bitbucket(Git)
- Played around with Docker
- AMQP (RabbitMQ)
- ARToolKit SDK
- SMS Gateway (Kannel)
- Logstash

### **OnePercentLab**

*Backend Engineer*

*March 2017 - August 2017*

I worked on the backend part of an BDC/Investment platform. The solution was to help in seamless change of currency and also investments

Technology, Software and Operating Systems used:

- Nodejs
- PostgreSQL
- Amazon Web Services

## **FEMMEBNB**

*Backend Engineer*

*MARCH 2018 - MAY 2018*

I single handedly worked on the backend system of Femmebnb web application using nodejs and mongodb as the primary database and elasticsearch for searching.

Technology, Software and Operating Systems used:

- Nodejs
- Mongodb
- Elasticsearch
- Amazon Web Services
- MailGun
